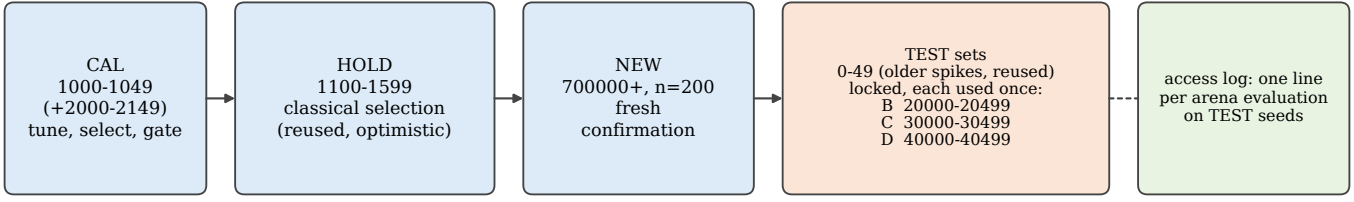
Seed sets (tune → select → confirm → TEST sets)



Rules governing every comparison

three budget axes per method
episodes | wall-clock | label source
(declared cap 2x; over-runs disclosed)

sanity gate before a null is read
constant-bias correction: +10 pp over
init, CI > 0; learned = +5 pp on CAL

pre-specified cards (time-stamped)
win: CI excludes 0 and >= +10 pp
